

# Digital Terrestrial Receiver Quick Setup Guide - Zinwell ZMT-620HD

## Step 1 – Connect your digital receiver

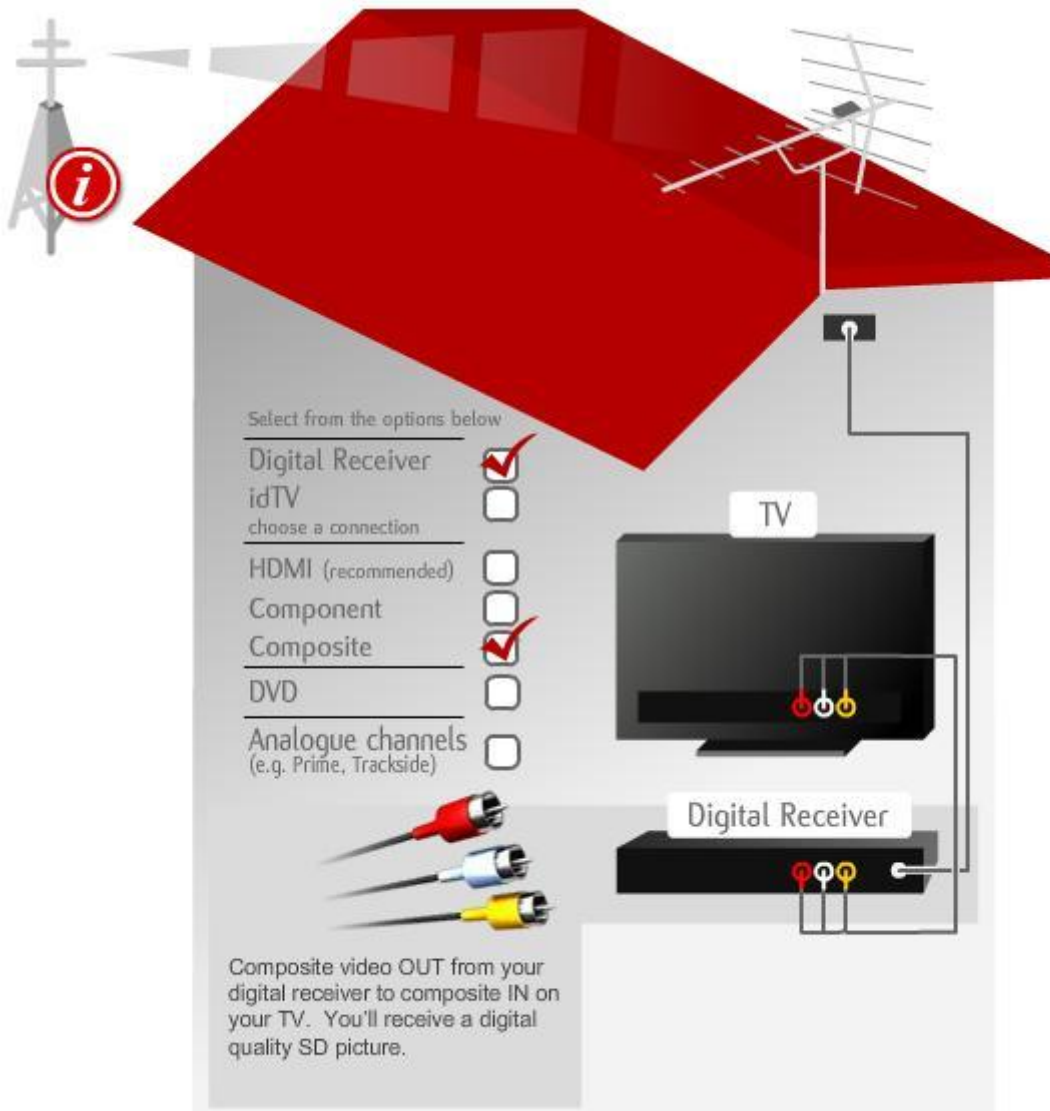

After unpacking your digital receiver, connect as shown in the diagram below.

### Option 1: HDMI

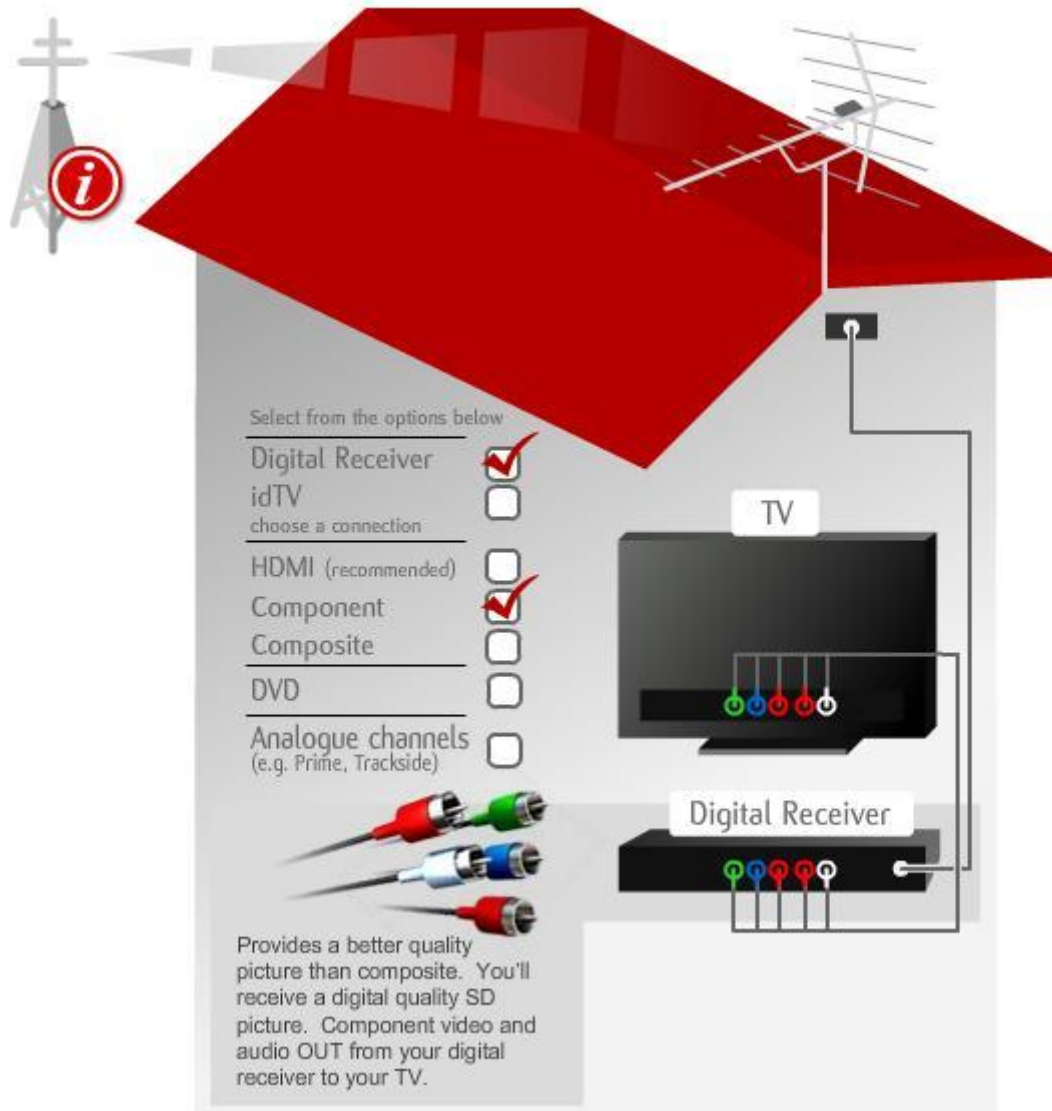

This is the recommended set up.

## Option 2: Composite

### Option 3: Component

## Step 2 – Start Auto Scan

Once you have the digital receiver connected, turn the power on. Please note the red light indicates you are in standby so when there is no light the unit is “on”.

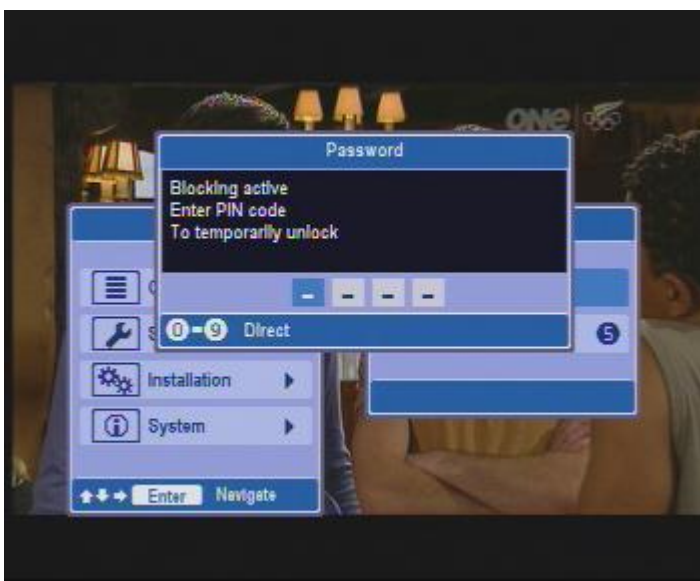

The receiver will take approximately **15-20 seconds** to power up. To start tuning enter

Menu > Installation > Auto Scan

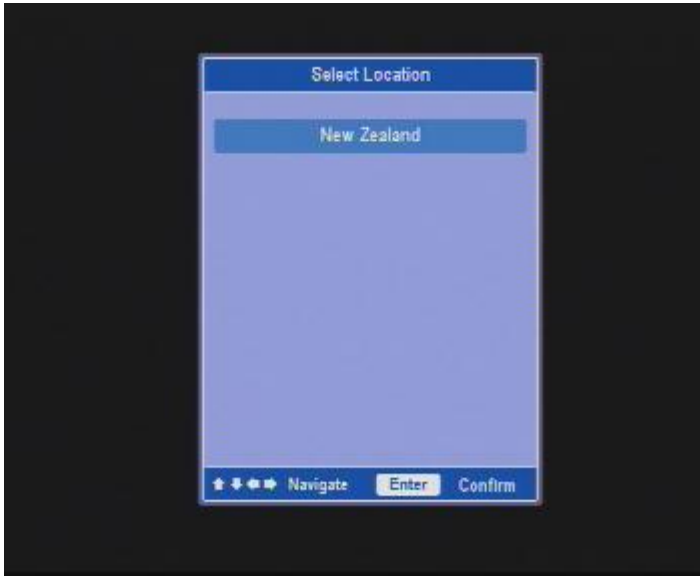

## Step 3 – Enter Password

0 0 0 0

## Step 4 – Select Country

New Zealand is highlighted. Select enter.

## Step 5 – Tuning in Freeview Channels

A screen showing tuning progress will be displayed (see example below). It will tell you that the digital receiver is automatically tuning in the Freeview channels. Tuning can take a few minutes. You do not need to take any action during the tuning process.

And that's it. You are now ready to enjoy the Freeview experience!

If you have any problems we recommend you check your aerial connection. If you still can't get a picture one of the installers listed on the installer directory on our website should be able to help.
